PROFESSIONAL SUMMARY

Fourth-year Business Information Systems student with hands-on experience in Excel, SQL, Power BI, Python, and Tableau. Skilled in building interactive dashboards, cleaning and modeling multi-source datasets, and translating raw data into actionable business insights. Seeking a Data Analyst opportunity to contribute to data-driven decision-making.

TECHNICAL SKILLS

Data Analysis & BI: Microsoft Excel (formulas, pivot tables, VLOOKUP, data cleaning, data modeling), Power BI (DAX, Power Query, data modeling, visualizations, dynamic reporting, interactive dashboards), Tableau

Programming & Databases: SQL (querying, filtering, JOINS, aggregation), Python (Pandas, NumPy, Matplotlib, EDA, data visualization, data cleaning, data modeling)

Core Competencies: Data Cleaning, Data Modeling, Exploratory Data Analysis (EDA), Dashboard Development, KPI Reporting, Business Intelligence, Data Visualization

EDUCATION

Bachelor's Degree in Business Information Systems (BIS)

Expected 2026

Thebes Academy, Cairo, Egypt | GPA: 3.05

PROJECTS

E-Commerce & Marketing Performance Analysis

[GitHub](#) – 2026

- Built an end-to-end analytics pipeline: ingested Kaggle CSVs into SQL, transformed data through cleaning, joins, and structured views, and connected to Power BI via DirectQuery for live querying.
- Designed a 3-page interactive dashboard (Overview, E-Commerce, Marketing) analyzing \$8.37M in revenue across 64K customers and 103K transactions using DAX measures, RFM segmentation, and loyalty-tier analysis.
- Discovered that 53% of revenue came from “Lost” customers and the Bronze tier drove 54% (\$4.5M) of total revenue — recommended targeted win-back campaigns and tier-upgrade incentives.
- Identified Affiliate as the top channel (\$1.61M) vs. Social (\$0.97M), and 60% of sessions on mobile — recommended budget reallocation and mobile checkout optimization.
- Tools:** SQL, Power BI, DAX

Global Sales Performance Analysis

[GitHub](#) – 2026

- Performed exploratory data analysis (EDA) on e-commerce sales using Python and Pandas, including data cleaning, data visualization, and feature engineering.
- Analyzed profit performance across 7 regions, 12 product categories, 2 sales channels, and 8 years to uncover key business patterns.
- Identified top-performing regions and high-margin product categories, supporting data-driven business decisions.
- Tools:** Python, Pandas, NumPy, Matplotlib

ADDITIONAL INFORMATION

Soft Skills: Effective Communication, Teamwork, Presentation, Fast Learner, Research, Multitasking

Languages: Arabic (Native), English (Professional Working Proficiency)
